

SUMMARY

Self-motivated, proactive, and results-driven tech professional with 6+ years of experience in data, technology, and business analysis in retail, ecommerce, telecommunication, and computer networking environment. Highly skilled at leveraging AI, dashboard development, research, requirement gathering, business intelligence, visualization, data modelling, database design, and product management. Strong communication skills with an eye for detail, creativity in problem-solving, collaboration, excellent time management and sense of urgency.

EXPERIENCE

Lead Analyst- BI Development & Analytics Walmart Canada

06/2021 - Present

- Spearhead Design and building of specialized data pipelines, data flows, schematic models, ETLs, business intelligence (BI) packages, dashboards, for business on various BI tools (Power-BI, Looker, Tableau), leading to 20% MOM country wide growth, estimating an annual GMV lift of CA \$1.1M.
- Built business intelligence reporting tools for leadership team using Microsoft Excel and Power BI in the first month 7 Reduced BI delivery time and latency by 50%.
- Provided business intelligence across 5+ cross-functional departments by doing ad-hoc analysis and creating reports with Power BI, Tableau, and similar software.
- Contributed to the data migration from Hadoop to GCP, improving data accessibility and extraction by 30%.
- Extracted data from 30+ sources using SQL queries from Hadoop, GCP and converted them into one combined source for reporting purposes using ETL techniques.
- Work closely with the vendor partners on weekly basis to optimize performance and make sure all the target KPIs are met.
- Worked with multiple data sets to apply qualitative & quantitative, customer research techniques and business profitability analysis for insight generation that lead to better customer experience and improving NPS by 2000 basis points.
- Conduct reviews and walkthrough sessions analyze project models, validate stakeholder requirements and explain core processes, risks, and mitigation techniques for new and upcoming projects.
- Work closely with executives and stakeholders to document business requests, design and own key strategic BI developments.

Operations Analyst Amazon Development Center

09/2017 - 09/2019

- Design and build data solutions to meet business needs and optimization by providing Data-Driven recommendations to progress and automate the marketplace business operations (MBO) process.
- Collaborate with the Business Analytics team to create ETLs, SQL scripts for extracting the data and reducing the delivery time by 25% Increase operational efficiency by 30% through process reengineering, and process mapping focusing on cost-effectiveness and reducing average handling time.
- Design and recommend automation which helped the team reduce the AHT of the whole team by 300 BPS.
- Analyze large datasets from 10+ different processes to identify patterns, trends, gaps, workflow analysis through process mapping and recommending better tools and technologies for ongoing process improvement/ SOPs, and create insights visualizations for stakeholders using visual tools like Tableau and Excel
- As a Subject Matter Expert/Individual Contributor (SME/IC), I provided comprehensive support across various processes for business. This encompassed conducting thorough analyses to identify operational gaps, subsequently devising and advocating

for policy enhancements and process optimization strategies. Additionally, I facilitated the training of associates and managers to ensure seamless integration of these improvements into our workflow.

EDUCATION

Certificate in Big Data Analytics 06/2024 - 12/2024
York University

Business Analytics & Data Science 01/2020 - 04/2021
St. Lawrence College - Post Graduate Diploma

- Dean's Honors List
- Subjects: Data Science, Agile Methodologies, Project Management, Operations Analysis, HADOOP, SQL, Power-BI, Tableau, RDBMS, R-Language, Strategy Planning and Analytics

Electronics and Communication 08/2013 - 05/2017
IILM College of Engineering and Technology (AKTU) - Bachelor of Technology

- Executive Secretary-Event Planning and Workshop committee for Robotics and Science Club.
- President of Annual Fest Committee.
- Committee member of Robotics and Science club.
